### **Cake Sculpting – CAR:**

This course is aimed at experienced cake decorators that want to increase their skills and take them to the next level with a 3D hand sculpted car cake. The session begins with a demonstration of how to determine proportions and make a template, then the cutting of the cake, layering with Ganache and set up of the overall cake. You will be taught how to sculpt the shape, cover it with icing and finish the design. The aim of this course is to introduce you further develop your cake decoration skills with advanced techniques such as 3D sculpting, 3D covering as well as decorating techniques such molding, indenting, painting, and piping. You will supported every step of the way by your teachers, giving you hints and technical support, ensuring that you will successfully achieve an amazing cake that will exceed your expectations.
